

Scribbling Art

1. Here is a project that you probably already do with your child.

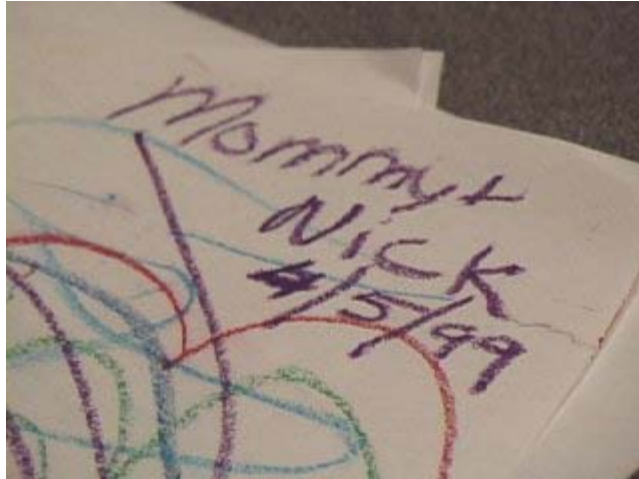

2. All you need are crayons and a sheet of paper.

3. When you and your child are comfortable and the child seems to be looking for something to do you can get out a piece of paper and some crayons and start scribbling.

4. Inevitably the child will mimic you and his or her journey into art will begin. Children should become comfortable and confident with the materials of art at a very young age.

5. Sign, date and keep the most interesting of your team scribbles so you and your child can see the process of their development over time.
